Project Title: Pokemon Website

I'd like to build a website with navigation down the left and multiple pages. The pages may also lead to other pages. There will be a prominent home button.

- **Home Page/History of Pokemon**
Has fun visuals to pull the audience in but is also informative of how Pokemon came to be, including the meaning of the name, the concept fabrication, and basic knowledge about the world of Pokemon
- **Video games**
- **Anime and film**
- **Pokemon Go**
- **Cultural influence**
- **Sources**
